# Batman Costume

Batman is on a Trick or Treat mission this Halloween! Get creative and make a unique superhero costume using materials found around your home and reusable Makedo parts.

To make this Batman costume find some cardboard, some material for a cape, black and yellow paint the print out template we've provided and get into action!
Happy Halloween!

· Cut · Score · Punch ·

1 To make your Makedo Batman Costume, begin by tracing the provided template on to cardboard. Cut out all the cardboard bits.
2 Use the point end of the Makedo Safe-saw and score on the dotted lines shown in the template. This is will make folding the cardboard easier. Connect a cardboard strap on the sides of the mask using Makedo Re-clips. Ensure the strap is long enough so that the mask sits over your eyes.
3 To make the arm cuffs, connect the two end flaps together using Makedo Re-clips as shown in the image.
· Connect · Hinge · Build ·

4 For the belt connect a cardboard strap to the sides ensuring that the strap is long enough to wrap around your waist.

5 To make the cape, score lines along the dotted lines shown in the template. Use the Makedo Lock-hinge on a slight angle and connect it to the centre with Makedo Reclips. For the shoulders we have used the Makedo Lock-hinges on a right angle to give it some shape.

6 To complete the cape, connect fabric to the top of the shoulders using Makedo Re-clips. Place the Pin through the cardboard shoulder and Lock-hinges and secure in to place.

· Build · Share ·

7 Finally to complete your superhero look, decorate your costume adding features such as the bat on your belt buckle. We've painted our costume jet black.

8 Your costume is now ready for action. Where there's a calling for help, put on your costume and share your adventures with us at mymakedo.com.
